McGregor's Year Book

Something for every Garden—Everything for some Gardens

This new Year Book, our silent salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States—offering something for every garden, everything for some gardens. Years of experience in packing plants has resulted in methods enabling us to guarantee their safe arrival, and in the years of our business career our products have found their way into every state and territory and into many foreign countries. For over 40 years we have pleased the flower lovers of America, and the business today is under the direct control of the founders and their sons. Our guarantee is an asset with us and a safeguard to you, giving absolute security to mail order buyers. We promise you as fine stock as can be grown, a large assortment and good service, and we believe therefore, that this catalogue, which we hope will be found pleasing and helpful, is entitled to the consideration of all buyers.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

Comparative Value of Roses

Don't think any Rose too small to do well. The main part of a Rose is its root system. The roots of one-year size plants, being carefully protected in pots, permits of the shipment and planting anywhere at any time of the year that the ground can be worked. Roses of this size are to be recommended for all Rose growing sections. Over the largest part of our country these one year Roses will make strong bushes in a summer's time and the ever-blooming variety will flower continually throughout the season. They are of wonderful value at the prices for which they can be obtained. If you wish the largest and best Roses for quick effect, then Roses of the two-year size, from four to five inch pots, and the three-year size plants, from five and six inch pots are to be recommended. Nothing better is obtainable anywhere in the country than this three-year size stock.

Remittance With Order

Please send sufficient money to cover your entire order. The safest way is by Postoffice Money Order or Express Money Order. Postage stamps may be sent for small amounts provided two cents extra is sent with the remittance. Send perfect stamps only.

Parcel Post Shipments, with Soil on Roots

If inconvenient for purchaser to receive an Express shipment mailable plants may be sent parcel post with soil on the roots, by customer so requesting with the order and adding double amount for postage as explained in table—page 2.

Express Shipments

All large decorative plants, shrubs, heavy or bulky stock must be sent by Express. When large potted plants are sent by Express the soil is left about the roots.

Premiums

Our terms being cash with the order enables us to give additional plants, bulbs, and seeds on orders amounting to \$1.00 or more, as follows: On \$1.00 worth of goods bought at single Plant, Bulb or Packet prices, select plants, bulbs or seeds to the value of 20 cents extra. On a \$2.00 order select 40 cents extra. On a \$3.00 order select 60 cents extra. On a \$5.00 order select to the value of \$1.00 extra. On \$6.00 select \$1.20 extra, etc. Larger orders, premiums in proportion. We do not allow premiums on nursery stock, nor can we give same as premiums

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses: namely, that they can be planted at any time of the year. The ball of the earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as in the case with the dormant plants, the pot-grown Rose, therefore, has many advantages over other Roses.

If You Wish Orders Held

be sure to say so, then we can book your order any later date desired; otherwise we assume order is wanted at once, and for shipment without further instructions.

Writing About Orders

We exercise the utmost care in filling orders, yet in the busy season errors or losses sometimes occur. Should you find it necessary to write about an order, be sure to give us date and copy of the original, amount of remittance, with full information to aid us in promptly taking care of the matter.

Our Nursery Dept.

Being separate from our Greenhouses, shipments of Trees, Evergreens, Fruits, etc., are sometimes sent separately.

Our Prices

will compare favorably, we believe, with those of any responsible firm in the U. S., and are so low we must ask cash with order.

FREE OFFER

If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the face of cover of this book, free. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses. (Roses 1-yr. size.)

McGregor's Guide to Gardening

It is not enough that plants simply be allowed to grow. They should be encouraged to grow. Our Guide to Gardening will help you to get the best results. Plants need care and respond readily to fitting treatment. All will grow but with intelligent care will mature with very different and attractive results. Give them every advantage through knowing them thoroughly and helping them to reach that maximum development which our book will help bring about approximately 300 subjects, 150 pages. Price 50c, postpaid—(25c with \$2.50 order) or (free with \$5.00 order.)

Order Early Let us suggest early orders even if plants are not wanted until later.

Surprise Offer After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. As a result we generally have surplus of all kinds of plants and rather than carry this stock over, we hold a Clearance Sale beginning June 1, and make up Surprise Collections of miscellaneous plants at 98c per collection, six collections for \$4.88. In these 98c collections we give several dollars' worth of plants. The plants in these collections must be strictly our selection. Orders accepted any time during the spring for delivery June 1.

Winter Protection of Roses

We have indicated the blooming season and hardiness of roses, as follows: "Monthly Blooming" and "Summer Blooming Hardy with Protection," which refers to the Teas and Hybrid Teas, that should have protection through the winter. "Hardy Summer Blooming" and "Hardy June Blooming" refers to those which are hardy and do not require protection; the Hardy Climbers included. Bush Roses, however, whether Teas, Hybrid Teas, Hybrids or the Cluster flowering types are always helped with that winter protection that keeps the plants and the ground around the base of the plant dry. There is much more in common, or should be, between animal and plant life than is generally acknowledged by those who strive for success in growing roses. Both demand a sufficiency of nourishing food and drink, a pure atmosphere, careful protection and thorough cleanliness.

Guarantee

We guarantee all Shrubs, Plants, Bulbs and Seeds that we send out to points within the United States to reach purchaser in good condition, when forwarded by mail or express. After goods are delivered to purchaser in growing condition our responsibility ends.

Springfield, Ohio, U. S. A. is headquarters in the United States for the growing and shipping of all kinds of plants and is the greatest Rose producing center in the world. It is centrally located and has unequalled facilities for receiving and shipping orders.

Garden Specialties Shown on Color Plates

McGregor's Fancy Japanese Chrysanthemums

(Illustrated in colors on back cover.)
The chrysanthemums which we show on our color plate, are by far the most gorgeous and elegant of our fall blooming plants. For massive blooms, grandeur of color, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know the chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The collection we offer, if well-grown, will produce the largest and finest blooms which can be used for exhibition purposes.

Special Offer The full set of McGregor's Fancy Japanese Chrysanthemums for \$2.32; three sets for \$6.24; five sets for \$9.36; ten sets for \$18.00.

Ibotia Privet Set plants six inches apart if planted in a straight row, or 12 inches apart if planted in a double row. This variety of Privet is more spreading than the California, and it is probably the variety of all the varieties. It is of dense growth, good green foliage, grows well in all soils. It can be trimmed as desired and will give the straight line hedge or the spreading type as would be represented by its natural growth. It is becoming more popular every year. Highly recommended. California Privet Set plants six inches apart if planted in a straight row, or 12 inches apart if planted in a double row. Of all hedge plants this is the most popular, and more of it is planted than all others combined. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. Its foliage is a rich, dark green, nearly evergreen, remaining on the plant until mid-winter. Nice plants, 85c per dozen, \$6.00 per 100. Large two-year plants, \$1.20 per dozen; \$9.00 per 100. Selected plants, \$1.50 per dozen; \$11.00 per 100.

Japan Barberry (Berberis Thunbergii) Should be set about eight inches apart, but is sometimes spaced wider. Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards fall assume rich, brilliant colors, the fruit or berries becoming scarlet. Absolutely hardy in all parts of the country. Nice plants, \$1.25 per dozen; \$8.00 per 100. Stronger plants, \$1.75 per doz.; \$10.00 per 100. Field plants, \$2.00 per doz.; \$12.50 per 100. Lodense Privet (Ligustrum Nanum Compactum.) A new and distinct dwarf form of Privet of extremely compact low-growing habit. Foliage of rich, dark green, particularly useful for hedges and borders as it stands bearing well and can be kept low very easily. \$3.50 per doz.; \$25.00 per 100.

Box Barberry A low growing compact form of the Barberry Thunbergii. Appears similar to boxwood and where low growing hedges are desired it makes a most attractive planting. While comparatively new it is being largely used in the East at the present time. Price, \$4.50 per doz.; \$35.00 per 100.

Amoor River Privet Set plants six inches apart if planted in a straight row, or 12 inches apart if planted in a double row.
